Detailed Action

This action is in response to the application filed on 6/29/2001.

Priority

No claim for priority has been made in this application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3, 4 & 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In particular claim 3 is indefinite stating:

Determining whether the potential transaction is an emergency transaction

Approving if yes

It is unclear to the examiner and one of ordinary skill in the art what is claim by this description, what is “emergency”

For the purposes of this review the examiner will interpret claim 3 to be

Determining whether the potential transaction from a merchant selling food

Approving if yes

In particular claim 4 is indefinite stating:

Approving the potential transaction if causes inconvenience

It is unclear to the examiner and one of ordinary skill in the art what is claim by this description, what defined by “inconvenience”

For the purposes of this review the examiner will interpret claim 4 to be

In particular claim 7 is indefinite stating:

Determining whether the product is associated with at least one of consumers emergency and a consumer necessity and

Allocating a low credit risk to the product when the product is determined to be associated with at least one of consumer emergency and consumer necessity.

It is unclear to the examiner and one of ordinary skill in the art what is claim by this description, what defined by “inconvenience”

For the purposes of this review the examiner will interpret claim 7 to be

Approving the potential transaction if under a certain dollar amount

Determining whether the product is associated with food

Allocating a low credit risk to the product when the product is determined to be associated with food

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-66 are rejected under 35 U.S.C. 103(a) as being unpatentable over Demoff et al. (U.S. Patent 6,456,984 B1) in view of Official Notice

Re claim 1: Demoff discloses:

A method managing financial transactions (with transactions that exceed credit limits), comprising (see Demoff, Abstract):

Comparing

Approving the transaction based on comparison (see Demoff, Figure 8, Item 302)

Although Demoff does not include determining merchant type, the examiner claim official notice credit fraud shut-off business practice. In particular credit card companies have internal business practices that monitors a number of variables and if any of these are meet they employ their “credit fraud shut-off business practice.” The monitoring includes but is not limited to: usage at a particular merchant, usage at a particular type of merchant (such as on-line) excessive usage in a time period, usage in different location. While monitoring these variables if the credit card companies suspect fraudulent behavior they will shut off the credit card immediately. The credit card user will then need to contact the credit card company and verify the transactions before the credit card is reactivated. This situation has personally happen to this examiner a number of time due to a credit card being used at a particular merchant or a large amount of items being purchased at one time.

Although the application is talking about extending additional “temporary credit” and not shutting off a credit card, it is clear that the same business practice could be employed to extend additional temporary credit. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to add determining merchant type as taught in Official Notice to Demoff.

It is clear that one would be motivated to following existing business practices for all processes.
